

1   **S1 Table. Socio-demographic characteristics and knowledge about dengue of**  
 2   **interviewed individuals.**

	Total (n=105)	Child questionnaire (n=51)	Adult questionnaire (n=54)	
<b>Age (n=103)</b>	n (%)	n (%)	n (%)	p-value <sup>a</sup>
18-30	39 (37.9)	8 (16.3)	31 (57.4)	
31-50	34 (33.0)	25 (51.0)	9 (16.7)	
>50	30 (29.1)	16 (32.7)	14 (25.9)	<0.001
<b>Sex (n=105)</b>				
Females	91 (86.7)	47 (92.1)	44 (81.5)	
Males	14 (13.3)	4 (7.8)	10 (18.5)	0.108
<b>Place of residence (n=105)</b>				
Candelaria	72 (68.6)	36 (70.6)	36 (66.7)	
Cooperativa	11 (10.5)	4 (7.8)	7 (13.0)	
Caña de Azúcar	22 (21.0)	11 (21.6)	11 (20.4)	0.693
<b>Education (n=104)</b>				
Illiterate/ pre or primary school <sup>b</sup>	17 (16.3)	11 (21.6)	6 (11.3)	
Secondary school	54 (51.9)	31 (60.8)	23 (43.4)	
University/ university polytechnic	33 (31.7)	9 (17.6)	24 (45.3)	0.009
<b>Occupation (n=104)</b>				
Student	16 (15.4)	4 (7.8)	12 (22.6)	
Housewife/Domestic-/manual worker	56 (53.8)	34 (66.7)	22 (41.5)	
Merchant/ Employee/ Office worker/ Professional/ University staff	32 (30.8)	13 (25.5)	19 (35.8)	0.022
<b>Religion (n=101)</b>				
No religion	6 (5.9)	0 (0.0)	6 (11.3)	
Catholic	76 (75.2)	37 (77.1)	39 (73.6)	
Christian/Protestant/Evangelist <sup>c</sup>	19 (18.8)	11 (22.9)	8 (15.1)	0.046*
<b>Overall knowledge score on dengue<sup>d</sup> (n=105)</b>				
≤4 correct answers	48 (45.7)	21 (41.2)	27 (50.0)	
≥5 correct answers	57 (54.3)	30 (58.8)	27 (50.0)	0.364

3   Legend S1 Table: <sup>a</sup>p-value corresponds to the comparison between the child and adult  
 4   questionnaire responses; <sup>b</sup>From the total sample, only one person was illiterate; <sup>c</sup>From the  
 5   total sample, one person was a Jehovah's witness; <sup>d</sup>Range overall knowledge score: 1-9  
 6   correct answers; \*Fishers exact test.
